

## Olive Tree Varieties

[www.novavine.com](http://www.novavine.com)

Variety	Origin	Use	Vigor	Tree Shape	Cold Hardy	Leaf Spot	Olive Knot	Start of Bearing	Fruit Yield	Ripens	Oil Yield	Comments
Aglandau	France	dual	med.	wide	high	mod. resist.	resist.	med.	med., alt.		high	self sterile; plant with pollinizer
Arbequina	Spain	oil	low	wide	high	mod. resist.	mod. resist.	v. early	high	early	high	considered self fertile but yields may improve with pollinizers
Ascolana	Italy	dual	high	erect	high	resist.	resist.	early	med.		med.	self sterile; plant with pollinizer
Cerignola	Italy	table	med.	erect	low	suscept.	suscept.	early	med., alt.		low	aka <i>Bella di Cerignola</i> ; very large fruit used for green olives in brine
Columella	France	oil	med.		med.	mod. suscept.			int., alt.	med. early	high	Aglandau is a pollinizer
Coratina	Italy	oil	med.	wide	high	mod. suscept.	mod. suscept.	early	high	v. late	high	self sterile; plant with pollinizer
Frantoio	Italy	oil	med.	wide	low	suscept.	suscept.	early	high	late	high	partially self fertile; better yields with pollinizer like Pendolino
Itrana	Italy	dual	high	erect	high	resist.	resist.	med.	high	late	med.	self sterile; pollinizers Leccino, Pendolino
Koroneiki	Greece	oil	med.	wide	low	resist.	suscept.	early	high	early/med.	high	very high fruit removal force
Leccino	Italy	oil	high	droop.	high	mod. resist.	mod. resist.	early	high	early	med.	self sterile; pollinizers Frantoio, Pendolino, Maurino, Moraiolo
Manzanillo	Spain	dual	med.	wide	med.	mod. suscept.	very suscept.	early	high	early	med.	self sterile; incompatible with Mission and Ascolano
Maurino	Italy	oil	med.	erect	med.	mod. resist.	mod. suscept.	early	high, alt.	med. early	med.	self sterile; plant with pollinizer
Mission	US	dual	high	erect	high	very suscept.	mod. resist.	med.	high, alt.	late	high	self fertile
Moraiolo	Italy	oil	low	erect	low	very suscept.	suscept.	early	high, const.	med.	high	self sterile; pollinizers Maurino, Pendolino
Pendolino	Italy	oil	med.	droop.	med.	suscept.	suscept.	early	high	med.	med.	self sterile; common pollinizers Leccino, Maurino, Frantoio
Picholine	France	dual	med.	wide	med.	resist.	mod. resist.	early	high	late	med.	partially self fertile
Pical	Spain	oil	med.	wide	high	suscept.	resist.	early	high	early	high	partially self fertile
Sevillano	Spain	table	med.	erect	high	resist.	suscept.	med.	low, alt.	early	v. low	self incompatible
Taggiasca	Italy	oil	high	droop.	low	suscept.	suscept.	med.	high	late	high	partially self fertile
Tanche	France	dual	high	wide	high	suscept.	resist.	late	med., alt.	late	high	partially self fertile; Cayon, Rougeon pollinizers
