

Variety	Origin	Purpose	Vigor	Growth Habit	Cold Tolerance	Leaf Spot	Olive Knot	Start of Bearing	Productivity	Ripening	Oil Content	Comments
Aglandau	France	dual	med.	spreading	high	moderately resistant	resistant	intermediate	medium, alternate		high	self sterile; plant with pollinizer
Arbequina	Spain	oil	low	spreading	high	moderately resistant	moderately resistant	very early	high	early	high	considered self fertile but yields may improve with pollinizers
Ascolana	Italy	dual	high	erect	high	resistant	resistant	early	medium		medium	self sterile; plant with pollinizer
Cerignola	Italy	table	med.	erect	low	susceptible	susceptible	early	medium, alternate		low	aka <i>Bella di Cerignola</i> ; very large fruit used for green olives in brine
Coratina	Italy	oil	medium	spreading	high	moderately susceptible	moderately susceptible	early	high	very late	high	self sterile; plant with pollinizer
Frantoio	Italy	oil	medium	spreading	low	susceptible	susceptible	early	high	late	high	partially self fertile; better yields with pollinizer like Pendolino
Itrana	Italy	dual	high	erect	high	resistant	resistant	intermediate	high	late	medium	self sterile; pollinizers Leccino, Pendolino
Koroneiki	Greece	oil	medium	spreading	low	resistant	susceptible	early	high	early/intermediate	high	very high fruit removal force
Leccino	Italy	oil	high	drooping	high	moderately resistant	moderately resistant	early	high	early	medium	self sterile; pollinizers Frantoio, Pendolino, Maurino, Moraiolo
Manzanillo	Spain	dual	medium	spreading	medium	moderately susceptible	very susceptible	early	high	early	medium	self sterile; incompatible with Mission and Ascolano
Maurino	Italy	oil	medium	erect	medium	moderately resistant	moderately susceptible	early	high, alternate	medium early	medium	self sterile; plant with pollinizer
Mission	US	dual	high	upright	high	very susceptible	moderately resistant	intermediate	high, alternate	late	high	self fertile
Moraiolo	Italy	oil	low	erect	low	very susceptible	susceptible	early	high, constant	medium	high	self sterile; pollinizers Maurino, Pendolino
Pendolino	Italy	oil	medium	drooping	medium	susceptible	susceptible	early	high	intermediate	medium	self sterile; common pollinizers Leccino, Maurino, Frantoio
Picholine	France	dual	medium	spreading	medium	resistant	moderately resistant	early	high	late	medium	partially self fertile
Picual	Spain	oil	medium	spreading	high	susceptible	resistant	early	high	early	high	partially self fertile
Taggiasca	Italy	oil	high	drooping	low	susceptible	susceptible	intermediate	high	late	high	partially self fertile
